

Tech Rider MALMØ (solo)

Can	Source	Mic	Comment
1	Midi keyboard with fader via USB	Controls Computer	Need a keyboardstand and a high table for sound interface and looper.
2	Kalimba	Into sound interface	Needs D.I.
3	Looper Ipad (lead vox effect)	Into sound interface	
4 5+ 6	Lead Vox (shure beat SM87 condensator mic) Audio Out	Into sound interface Stereo Output from sound interface	Requires phantom power

Visual details

We bring visuals and need a projector, computer and a white canvas to project visuals behind the stage. A white wall behind the stage will also work. When people enter the room we will play a looped sounddesign of stars and it should fade out when the artist starts to play the first tune. We deliver the sounddesign for the soundtechnician during the soundcheck. It is important that the room can be completely dark during the show and kindly ask that there are no lights/lamps on the tables of the audience.

Record stand

MALMØ need a place to sell her records during and after the show – a table, paper and penn near at the record stand.

Backstage

MALMØ need a private backstage room – not shared with other bands and preferably a place to lie down. Need a meal and drinks before showstart and she is vegetarian. We appreciate snacks, fruit, tea, coffee and cold drinks.
